## Admin

Actor in package 'Airline\_Overview'

Admin  
Version 1.0 Phase 1.0 Proposed  
Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## Manager

*Actor in package 'Airline\_Overview'*

Manager  
Version 1.0 Phase 1.0 Proposed  
Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## User

*Actor in package 'Airline\_Overview'*

User  
Version 1.0 Phase 1.0 Proposed  
Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## Account Info

*UseCase in package 'Airline\_Overview'*

Account Info  
Version 1.0 Phase 1.0 Proposed  
Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## Add Flight

*UseCase in package 'Airline\_Overview'*

Add Flight  
Version 1.0 Phase 1.0 Proposed  
Kristine Holland created on 3/5/2017. Last modified 3/5/2017

### Basic Path

Basic Path:

<sup>1</sup> Manager receives flight info. <sup>2</sup> Updates database - adds new row. <sup>3</sup> System refreshes flight database (updates "Flight Search").

## Adjust Reservation

*UseCase in package 'Airline\_Overview'*

Adjust Reservation  
Version 1.0 Phase 1.0 Proposed  
Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## Cancel Reservation

*UseCase in package 'Airline\_Overview'*

Cancel Reservation  
Version 1.0 Phase 1.0 Proposed  
Kristine Holland created on 3/5/2017. Last modified 3/5/2017

### Basic Path

**Basic Path:**

<sup>1</sup> User logs into account. <sup>2</sup> System loads user dashboard (displays future flights and previous flights). <sup>3</sup> User clicks "Cancel Reservation" next to flight they wish to cancel in the "Upcoming Flights" section. <sup>4</sup> System displays details of reservations. <sup>5</sup> User selects "Process Cancellation". <sup>6</sup> System displays "Reservation Successfully Cancelled". <sup>7</sup> System sends user confirmation email. <sup>8</sup> System notifies airline manager of cancellation. <sup>9</sup> Manager updates flight info.

## Create Account

*UseCase in package 'Airline\_Overview'*

Create Account

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## Create Manager Account

*UseCase in package 'Airline\_Overview'*

Create Manager Account

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

### Basic Path

**Basic Path:**

<sup>1</sup> Receive new user account request from HR. <sup>2</sup> Creates database row for user with information provided. <sup>3</sup> Admin generates username and password. <sup>4</sup> System emails new username and temp password to user. <sup>5</sup> User logs in with username and temp password. <sup>6</sup> System prompts user to change temp password. <sup>7</sup> User changes temp password. <sup>8</sup> System updates database to reflect new password.

## Create User Account

*UseCase in package 'Airline\_Overview'*

Create User Account

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

### Basic Path

**Basic Path:**

<sup>1</sup> Receive new user account request. <sup>2</sup> Creates database row for user with information provided. <sup>3</sup> System generates "email verification" email and sends to user. <sup>4</sup> User verifies account.

## Flight Selection

*UseCase in package 'Airline\_Overview'*

Flight Selection

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## Login

UseCase in package 'Airline\_Overview'

Login

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## Login

UseCase in package 'Airline\_Overview'

Login

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## Make Reservation

UseCase in package 'Airline\_Overview'

Make Reservation

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

### **Basic Path**

Basic Path:

<sup>1</sup> User selects "Book This Flight" link from list of flights. <sup>2</sup> System checks if user is logged in. <sup>3</sup> System displays a screen with input fields for credit card number, cardholder name, and credit card expiration date; system auto populates user information (can be updated if desired). <sup>4</sup> User enters credit card info or selects credit card info from drop down menu (if stored in account). <sup>5</sup> User clicks "Submit". <sup>6</sup> System displays details of reservation. <sup>7</sup> User clicks "Complete Reservation". <sup>8</sup> System displays "Reservation Successfully Made" alert. <sup>9</sup> System sends email to user and airline manager with reservation information. <sup>10</sup> Manager updates flight to reflect booking.

### **Alternate Paths**

User not logged in:

(at <sup>2</sup>)

System prompts user to log in. User logs into system. System directs user back to list of flights.

Incomplete Form:

(at <sup>4</sup>)

User does not enter in data for all required fields. System alerts user and highlights required fields in red.

User clicks "Cancel":

(at <sup>5</sup>)

User clicks "cancel". System takes user back to list of flights (search result screen).

User clicks "Cancel" - Reservation:

(at <sup>7</sup>)

User clicks "cancel". System takes user back to credit card info screen.

## Reset Password

UseCase in package 'Airline\_Overview'

Reset Password

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

### **Basic Path**

Basic Path:

<sup>1</sup> User or Manager clicks "Forgot Password". <sup>2</sup> System takes them to ForgotPassword.html. <sup>3</sup> System displays input fields for username or email. <sup>4</sup> User/Manager inputs username or email. <sup>5</sup> User/Manager clicks "submit". <sup>6</sup> Admin receives password reset request. <sup>7</sup> Admin verifies user by searching for user in database. <sup>8</sup> Admin deletes old password. <sup>9</sup> Admin generates new temporary password and inputs into database. <sup>10</sup> System sends user temporary password and instructions to update. <sup>11</sup> User logs into system. <sup>12</sup> User changes temporary password to new password. <sup>13</sup> System updates database with new password.

#### **Alternate Paths**

User does not exist:

(at <sup>8</sup>)

Admin is unable to locate user with username or email. System notifies user that account does not exist.

## **Review Transaction**

*UseCase in package 'Airline\_Overview'*

Review Transaction

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

## **Search for Flights**

*UseCase in package 'Airline\_Overview'*

Search for Flights

Version 1.0 Phase 1.0 Proposed

Kristine Holland created on 3/5/2017. Last modified 3/5/2017

#### **Basic Path**

Basic Path:
